

DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 4-21, 24, 27-56 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1 prior art teaches all limitations of the claim except in response to the termination of the first GPRS MM context while the mobile device is out of network coverage of any GPRS wireless network, queuing a first set of data in a local data store associated with the first GPRS MM context, wherein the first set of data includes one or more information transfer data frames that include user data, the user data including at least one of email data, calendar data, voice mail data, and task item data; and in response to the establishment of a second GPRS MM context, deleting the first set of data associated with the first GPRS MM context.

Regarding claim 24 prior art teaches all limitations of the claim except in response to the termination of the first PDP context while the mobile device is out of network coverage with any wireless data network, queuing a first set of data in a local data store associated with the first PDP context, wherein the first set of data includes one or more information transfer data frames that include user data, the user data including at least one of email data, calendar data, voice mail data, and task item data; and in response to the establishment of the second PDP context, deleting the first set of data associated with the first PDP context.

Regarding claim 41 prior art teaches all limitations of the claim except in response to the termination of the first communication link while the mobile device is

out-of- coverage with any wireless network, queuing data in the mobile device relating to the first communication link, wherein the data includes one or more information transfer data frames that include user data, the user data including at least one of email data, calendar data, voice mail data, and task item data; and in response to the establishment of the second communication link, deleting from the mobile device the queued data relating to the first communication link.

This taken with other limitations of dependent claims is considered novel and non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chandrahas Patel whose telephone number is (571)270-1211. The examiner can normally be reached on Monday through Thursday 7:30 to 17:00 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ricky Ngo can be reached on 571-272-3139. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
